

Exchanging information to transform patient care.

FOR PHYSICIANS

*Improving quality and reducing costs through interconnectivity*

### Healthix provides a comprehensive picture of a patient's care across providers, regions and over time

Healthix, as the largest public health information exchange (HIE) in the nation, connects practitioners to timely patient information to facilitate care coordination and promote cost-effective solutions. We support over 450 provider organizations all across New York City and Long Island -- from healthcare systems, hospitals and radiology centers to laboratories, health plans and more.

### Healthix optimizes care coordination -- while ensuring privacy and security.

#### Coordinate Care

- Reduce duplicative tests and avoidable hospital re-admissions by accessing diagnostic reports, medication lists, including laboratory and radiology reports.
- Monitor and manage complex patients through customizable, real-time clinical event notifications.
- Know when your patients have been admitted or discharged from the emergency room or an inpatient stay with real-time alerts routed to your email or smart phone.

#### Secure Messaging and eReferrals

- Simplify electronic patient referrals with secure HIPAA compliant messaging, and coordinate care with providers to meet Meaningful Use requirements.

#### Privacy and Security

- Healthix ensures patient privacy through compliance with statewide and federal privacy and security policies.

*Secure access to patient information, wherever and whenever it's needed*

# Healthix Services Provide Actionable Data, Available in Real-Time 24/7

*Healthix offers a complete range of technical and implementation services to facilitate clinical information exchange*

## Patient Search

Healthix is a gateway to real-time actionable patient data to improve routine care, emergency care, or care management. Data can be queried directly from an EHR via Single Sign On or through the Healthix Portal. With increased patient mobility and expanded healthcare delivery options, Healthix provides access to the bigger picture 24/7.

## Clinical Event Notifications (CENs)

Clinical Event Notifications (CENs) help providers and care managers coordinate patient care by notifying them of these events within Healthix:

- Hospital and Emergency Department inpatient admissions and discharges
- Cross RHIO CENs also includes NYC Health+Hospitals
- Skilled Nursing Facility admissions and discharges
- Incarceration and release from NYC Correctional Facilities
- Patient expiration (death)
- Frequent ED usage

## Direct Messaging

Healthix supports secure HIPAA-compliant messaging among providers and care teams by sending encrypted health information to trusted recipients. Benefits include: integration with EHRs; support of meaningful use transition of care requirements; and capability to send CCDs.

## Delivery of Clinical Summaries

Healthix has the ability to push clinical summaries (CCD and C-CDA | documents) and lab results to health homes, PPSs, FQHCs, hospital-based health systems, and other Participants when their patient has a triggering event in Healthix or upon request by a Participant.

**Where efficiency, communication and better patient care come together.**
