### About this job:

Healthix is seeking a Senior Network Engineer to manage its network infrastructure with a focus on Server firewall in both Linux and Windows, network infrastructure and VPN connectivity services. This position reports to the Engineering Manager of the IT Department. The Senior Network Engineer is responsible for collaborating with the Project Management, Development, Security and HIE Support teams to ensure successful project implementations. This role is hands on and accountable for ensuring the reliability, availability and security of Healthix services to its customers. Experience in a Healthcare Payer/Provider environment is preferred.

### Responsibilities:

- Perform advisory role on complex project initiatives.
- Maintain Companies Network IP inventory and assign IP accordingly.
- Responsible for VPN connectivity via site-to-site and user connections.
- Go-to Person for anything network related including firewalls, ACL, Cisco Switch, VPN, Imperva Web Application Firewall, F5 Load Balancer, IP-Tables etc.
- Ability to work with various teams in the organization such as Quality Assurance, Development, Project Management to ensure delivery of projects on time.
- Create Network VLAN's and modify firewall ACL on demand.
- RSA Administration including new user VPN setup.
- Linux, Windows Server 2008/2012 administration.
- Work closely with Information Security Team to remediate network security vulnerabilities.

### Requirements

- Bachelor's Degree
- 10+ years of experience in Information Technology
- CCNA, CCNP highly preferred.
- Expert knowledge in Cisco Networking Devices, VMWare networking, NetApp networking, Active Directory Network Infrastructure.
- Expert knowledge in Imperva/F5 Firewalls, CISCO Switch port configurations including MAC address security, VLAN configurations, ACL.
- Apache Web Servers knowledge is desirable.
- Prior Certificate Management experience highly desirable.
- Expert in Windows and Red Hat Linux OS Firewall.
- Motivated, enthusiastic, and pro-active Virtual System/Network Administrator with an excellent 'can-do' attitude.
- Responsible for operational activities in support of Healthix business areas and customers.
- Strong technical understanding of IT infrastructure architecture, design and operations.

- Comprehensive understanding of Infrastructure components and protocols and how they fit into an enterprise architecture, including network communications protocols.
- Network Understanding of VMware, RedHat, HP, NetApp, IBM System servers, Cisco UCS servers, virtualization, SAN and NAS, Active Directory.
- Excellent ability to collaborate comfortably and effectively work with senior managers and other key leaders including peers in making technology decisions.
- Excellent ability to multitask and prioritize tasks on multiple fronts.
- Strong oral, written and communications skills.
- Positive attitude, Willingness to take initiative and responsibility for specific deliverables.
- Experienced in Administering Linux, and Windows Server 2012/2008.
- Design, Implementation and Administration of VMware network including distributed switched and VLAN's.
- Strong Linux Administration knowledge.
- Successful track record of building, managing and improvement of IT network Infrastructure.
- Experience in component planning/activities using Visio.
