FOR EMPLOYERS

Improve employee health while containing costs

Healthix is a not-for-profit health information exchange (HIE) serving New York City and Long Island, regulated and sponsored by the New York State Department of Health. Healthix aggregates patient data to create a composite picture of a patient's health.

Healthix...

- Assists in coordinated care by giving physicians a more complete view of the patient's health
- Improves patient satisfaction by reducing duplicate tests and imaging studies
- Helps Health Plans and providers collaborate to improve patient health
- Engages patients as proactive partners in their own care
- Fosters a collaborative model of information and data exchange focused on the patient's health

**Under New York State Policy...**

- Patients control access to their personal health information (PHI) in Healthix. Written or electronic consent is required
- Providers and Health Plans access PHI only for treatment, care management and quality improvement

Encouraging your employees and Health Plans to engage with Healthix can promote better outcomes, improve satisfaction and lower costs

How Healthix Provides Data to Support Employees

Healthix exchanges data among healthcare providers and Health Plans across New York City and Long Island. Healthix also connects with other exchanges in New York State now, and nationally in the future.

How Healthix Can Help

Healthix is the largest public health information exchange (HIE) in the country, bringing together over 250 healthcare organizations at more than 1,350 different facilities across New York City and Long Island. We provide secure access to clinical data of more than 16 million patients to improve quality of care, efficiency and effectiveness. Healthix delivers patient data electronically 24/7 in real time. All exchange is controlled by patient consent.

Intervention at the point of care – Clinical Event Notifications

Healthix can notify the patient's physicians and care managers in real time if the patient registers in an emergency room or is admitted as an inpatient, ensuring effective treatment and follow up care. Through analytics Healthix can alert physicians to changes in specific clinical conditions and identify patients at future risk.

- Help identify and manage high-risk patients
- Prevent avoidable hospital admissions and re-admissions
- Coordinate follow-up care
- Ensure proper referrals
- Improve satisfaction and outcomes
