This position reports to the Engineering Manager of the IT Department. The Systems Engineer is responsible for collaborating with the Project Management, Development, Security and HIE Support teams to ensure successful project implementations. This role is hands on and accountable for ensuring the reliability, availability and security of Healthix services to its customers. Experience in a Healthcare Payer/Provider environment is preferred.

 Responsibilities:

• Perform advisory role on complex project initiatives.
• Responsible for VPN connectivity via site-to-site and user connections.
• Ability to work with various teams in the organization to ensure delivery of projects on time.
• Backup role to the Senior Network Engineer.
• Microsoft SQL 2012 server administration.
• Imperva SecureSphere administration (IDS).
• BeyondTrust Network Scanner administration.
• Tripwire Administration.
• RSA Administration including new user VPN setup.
• Linux, Windows Server 2008/2012 administration.
• VMware administration.
• NetApp Storage administration.
• Work closely with Information Security Team to remediate network security vulnerabilities.

Requirements

• Bachelor's Degree
• 10+ years of experience in Information Technology
• CCNA, CCNP highly preferred.
• Expert knowledge in Cisco Networking Devices, VMWare networking, NetApp networking, Active Directory Network Infrastructure.
• Expert knowledge in Imperva/F5 Load Balancer highly desirable.
• CISCO Switch port configurations.
• Expert in Windows and Red Hat Linux OS Firewall.
• Motivated, enthusiastic, and pro-active System/Network Administrator with an excellent 'can-do' attitude.
• Responsible for operational activities in support of Healthix business areas and customers.
• Strong technical understanding of IT infrastructure architecture, design and operations.

• Network Understanding of VMware, Redhat, HP, NetApp, IBM System servers, Cisco UCS servers, virtualization, SAN and NAS, Active Directory.

• Excellent ability to collaborate comfortably and effectively work with senior managers and other key leaders including peers in making technology decisions.

• Excellent ability to multitask and prioritize tasks on multiple fronts.

• Strong oral, written and communications skills.

• Positive attitude, Willingness to take initiative and responsibility for specific deliverables.

• Experience in component planning/activities using Visio.
