

Welcome

Healthix Annual Refresher Training

Welcome to Healthix Training

This annual refresher training is a mandatory requirement from the State of New York, and reviews the necessary policies regarding use and privacy of data.

Consent Requirements

Patient Consent: Users can only access a patient's PHI if affirmative consent is provided. Exceptions:

- One-to-One Exchange
- Public Health Reporting and Access
- Break-the-Glass
- Data and Operation Efficiency
- De-Identified Data for Research
- Organ Procurement Access

Consent Policies

are fundamental to the successful use of a Health Information Exchange (HIE). Strictly speaking, you can access a patient's Protected Health Information (PHI) only if consent is given.

Exceptions are:

- One-to-One Exchanges
- Public health reporting and access. For example, reporting that is being done for monitoring disease trends, outbreaks and/or public health emergencies
- Breaking the glass in an emergency situation
- Converting data, improvement of evaluation of operations
- De-identified data as in the case of conducting research
- Organ procurement organization access - solely for the purposes of facilitating organ, eye or tissue donation and transplantation

Consent Details

- Patient Grants Community Wide Consent – YES
- Patient Grants Affirmative Consent - YES
- Patient Grants Emergency Only Consent
- Patient Denies Consent
- Patient Denies Consent - ALL
- Undecided Status
- Consent Withdrawal
- Consent for a Minor

Consent Details

Community Wide Consent – patients give the right for users in Healthix - that are involved in their care - to view their PHI. This affirmative decision has no expiration date and is in effect until the individual chooses to change their consent.

Patient Grants Consent – They give the right for a single organization's users to view their PHI.

Emergency Only Consent – The individual stipulates that their information can only be used in an emergency. This access is for only users involved in acute care (i.e. ER MD).

Patients Denies Consent – If consent is denied, then even in an emergency situation their PHI will be blocked.

Patient Denies All – A universal no. The individual states they do not wish for any organization in Healthix to ever have the ability to view their information.

Undecided Status – If an individual is unsure or has never given consent, their PHI can be accessed only in an emergency.

Consent Withdrawal – Individuals can withdraw or change their consent at anytime.

Consent for a Minor – Parents can give consent for a child until 18 years. The minor from 10 until 18 can give one-time consent at a visit.

Break-the-Glass

- Must Be An Emergency
- Patient Must Have Undecided Status or Emergency Only Status
- Must Have User Role that Allows Access

All Instances Are Audited

Break the Glass (BTG) Access
 Provides one time access, during an encounter, to the PHI of a patient in an emergency situation.

- Factors necessary to BTG:**
- 1 - It must be an emergency situation that requires immediate medical attention and the patient must be unable to give consent
 - 2 - The patient must have an undecided consent status for the participating organization or
 - 3 - An emergency only status
 - 4 - The Healthix user breaking the glass must have a user role that allows this access (i.e, ER MD)

- Other things to consider:**
- BTG is for one-time access only.
 - All BTG events are audited by Healthix and Participant Organizations and must be fully reported on.
 - Not every authorized user of Healthix has a role that allows them to BTG.

Breaking the Glass
 When you click on the BTG you will be taken to this screen, where you acknowledge your reason for accessing this information.

Patient Engagement

Healthix depends on our Participant Organizations to engage patients and collect consent

- Patients have the right to access their PHI, inquire how it has been accessed, and inform if there are any discrepancies.

Patient Engagement

Healthix depends on participant organizations to engage and educate patients about Healthix and collect consent.

Participants must let the patient know when their information has been accessed. Patients always have the right to access their PHI.

Authorization

Authentication

Access

Authorization – Defines who has access to the PHI, your organization has designated you, and Healthix has assigned you access based on your role in your organization. Your user role determines the data you can access, and training required.

Authentication – Was required in setting up your access to ensure you are who you claim to be.

Access – Each authorized user is given a unique username and password. This password must be changed every 90 days and you cannot re-use passwords. Passwords should never be shared, or sent electronically. And remember, if you walk away from your computer lock or log-off the system.

HIPAA Compliance

As part of a Healthix Participant organization you must comply with all of safeguards set forth in the HIPAA Privacy & Security Rules

QUESTIONS:

- Contact Your Privacy or Security Office
- Support @ Healthix.org

As part of a Healthix Participant organization you must comply with all of safeguards set forth in the HIPAA Privacy & Security Rules.

If you have questions regarding HIPAA, contact your Privacy Officer or Security Officer to ensure compliance.

If you need additional support, contact Healthix at support@healthix.org

Breach & Sanctions

Breach: An impermissible use or disclosure that compromises the security/privacy of PHI

- Must be Reported to Healthix without Delay
- Healthix to Investigate

Breach and Sanctions

A breach is an impermissible use or disclosure that compromises the security or privacy of the PHI.

In the event of a Breach

- It must be reported to Healthix without delay, in writing.
- If Healthix becomes aware of a breach, we will investigate.
- If a breach has occurred, Healthix will notify Participants, require the Participant to notify the patient as required and any applicable regulatory agencies in accordance with law.
- Sanctions will be imposed if the breach was deemed intentional, egregious or substantial in its violation.
