

# Healthix Vendor Interoperability Program (VIP)

Elevate your market presence to over 1,200 New York healthcare organizations by becoming a Healthix VIP Member

## Overview

The Healthix Vendor Interoperability Program (VIP) supports vendors seeking to simplify interoperability with healthcare providers. As a member of VIP, you have the ability to enhance your organization's presence to over 1,200 healthcare organizations in the New York market and securely connect to Healthix data.

Healthix VIP Members have access to all Healthix technical specifications and industry leading interoperability models to help support product development and expansion.

As the largest public health information exchange (HIE) in the nation, Healthix facilitates the coordination of care and secure exchange of patient information to improve clinical outcomes, promote efficiency and reduce healthcare costs. Healthix shares data of over 17 million individuals, connecting over 7,000 facilities across New York City and Long Island.

## Key Components of VIP Membership include:

- Ability to exchange Healthix data and services through a single solution
- Confidence and assurance to your healthcare providers that your technology has been vetted and approved as secure and compliant with New York State regulations and policies
- Leveraging the Healthix brand in the New York marketplace

## Key Benefits of Membership

- Ability to provide Healthix data and services to customers through a single solution
- Leverage the Healthix name, the largest public HIE in the nation and the recognized leader in the New York market
- Eliminate the expense and need to build and maintain costly aggregation platforms

Healthix is HITRUST CSF Certified. Our platforms - InterSystems HealthShare, Health Insight, HBI Spotlight Analytics - have all earned certification.

## Technical Innovation

Healthix data is delivered in real-time, allowing for timely interventions at the point of care and improved patient care coordination.

### Healthix Services:

- **Data Accessibility:**  
Patient record search, seamless integration with more than 28 EHR vendors, clinical information updates through the sending or query of a CCD or CCDA
- **Alerts:**  
Healthix can send event-based alerts when a patient is admitted to, or discharged from an ED, hospital, skilled nursing facility or a NYC corrections facility. Additionally, smart alerts can be triggered based on defined criteria (e.g., change in viral load or lab value)
- **Analytics:**  
Healthix can provide predictive analytics services to help manage patient populations and risk levels

## Promoting a VIP Member

Once the integration is complete, the marketing kit is designed to help promote the relationship and help build awareness to achieve shared business goals.

### Vendor Interoperability Program Marketing Kit Includes:

- Healthix logo for partner use
- Press release template
- Announcement on the Healthix homepage and VIP page
- Introduction in Healthix Newsletter
- Joint promotion of a Healthix Participant success story (after implementation, if appropriate)

If you have any questions,
