

EHR Model Integrations: Live and in Progress

Healthix deploys sites using three models of integration: (1) Hub Model – where Healthix connects to the EHR's Hub to exchange data with multiple practices. Hub Models dramatically reduce time, cost and effort. (2) Healthix Gateway Vendor (GV) – enables Participants' EHRs to connect to Healthix within 6 to 8 weeks through a robust data feed, regardless of their EHRs' ability for advanced interoperability. (3) Conventional Integration (Non-Hub) – supports customized connections.

Healthix is now waiving its hub model fees (previously \$2,500) for all new Participants looking to connect to the 28 existing Hub Model EHRs with more on the way.
